

Mobile Development Team Leader

The Position

We are looking for a Mobile Development Team Leader to join our client team. He will be responsible for the delivery of a Scrum team focused on mobile development, and will actively participate to the Android development. The team is composed of iOS developers, Android developers, backend developers and a Product Owner.

Job Responsibilities

- Responsible that the team delivers on-time high-quality according to the sprint scope
- Leads the team of both Frontend and Backend (java) developers
- Provide guidance on mobile technical choices
- Work hand-in-hand with Product Owner in maintaining and expanding the mobile applications
- Setup and encourage best practices in the Scrum team : TDD, BDD, code reviews,...
- Coordinate and guide mobile development resources, both internal and external
- Help improve internal tools and processes
- Analyze business requirements and convert them in quality apps
- Produce clean maintainable Android code and unit tests
- Keep apps up-to-date, while staying informed about new technologies, developments and best practices in the Android world

Desired Skills & Experience

- Master in Computer Science or equivalent experience
- 3-5 years of team leading experience
- Ability to inspire and motivate a multi-disciplinary team
- Excellent knowledge of the Scrum methodology
- Good knowledge of Restful web-services and Json parsing
- Hands-on experience in Android development and best practices (TDD, BDD, peer programming)
- Awareness of trends and innovations
- Strong communication skills
- Problem solver who goes the extra mile to get results
- Organized team player
- Ability to simultaneously handle multiple high profile projects
- English speaking. French and Dutch are assets

We offer

- A professional and stimulating workig environment
- Opportunity for personal development in line with business growth.
- Rich and acknowledged e-business expertise.
- Attractive remuneration
